Art Unit: 1742

1. Receipt of the Information Disclosure Statement on July 12, 2006, is acknowledged
2. The following is an examiner's statement of reasons for allowance: As indicated by the English language abstract, Jp 60 046399 is directed to apparatus with an exhaust pump provided in an exhaust pipe connected to the top end of a cell for reserving an electrolytic solution. EP 0 879 902 A2 and corresponding US 6,258,244 B1 are directed to a method and apparatus in which a deaerating device is provided in the circulation line for the reaction solution of a reaction vessel. US 3,623,962 is directed to a method and apparatus for decreasing sludging in a stannous-tin electrolyte used in continuous -strip electroplating by continuous deaeration of the electrolyte. The references do not suggest a method for plating metal in fine channels of a substrate or in opening portions in a resist formed on a surface of a substrate as recited in the instant claims, in particular the steps of using a deaerating device to deaerate dissolved gas in a preprocessing solution, contacting the substrate with the deaerated preprocessing solution to absorb air bubbles in the fine channels, and then contacting the surface of the substrate with a plating solution for plating metal into the fine channels.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
